Quiz

# Sea Star Superpowers

Starfish are sea stars, not fish.

## Tube feet

Tiny feet help a sea star crawl and grip.

## Stomach trick

A sea star can push its stomach out to eat.

## Regrowth

Some sea stars can regrow a lost arm.

## Not a fish

Sea stars have no fins, scales, or gills.

## Quick Words

**Tube feet:** tiny feet under the arms

**Regenerate:** grow back a lost body part

**Marine:** living in the ocean

# Label the Sea Star

Use the word bank to label the body parts.

## Word Bank

arm

central disc

tube feet

mouth

eyespot

A sea star uses tube feet to crawl and grip.

# Fish or Sea Star?

Sort each fact into the correct group.

## Fish

## Sea Star

has fins

has tube feet

has scales

can regrow an arm

uses gills

has no backbone

My conclusion: A sea star is not a fish.

# Tide-Pool Scientist Log

Look only. Leave tide-pool animals where they are.

🌿 Date

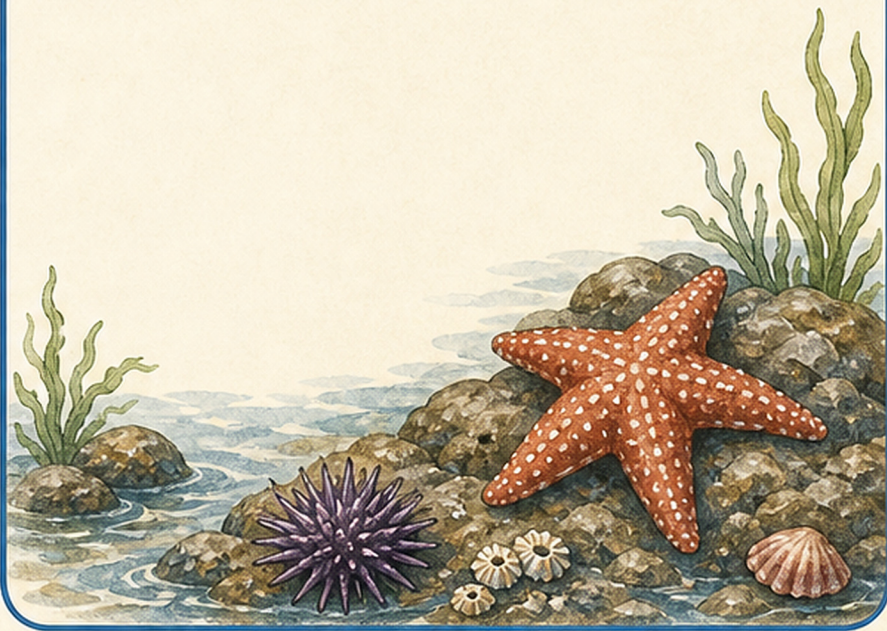

🌿 Beach or tide pool

🌿 Animal seen

🌿 Color and shape

🌿 How was it moving?

Draw what you saw
